**A2** Very recently Sunita Devi (44) who had severe cardiac problems went in for a heart transplant. She does not know who the donor is but she is full of gratitude for the person whose heart is now pumping blood and keeping her alive. She underwent heart transplantation at Sir Ganga Ram Hospital a few days back, making it the 30<sup>th</sup> heart transplant in Delhi and the first in a private hospital. India's first heart transplant was done at the All India Institute of Medical Sciences(AIMS) on August3, 1994 which has 26 since then. With three successful transplants, Army Research and Referral is the only other hospital to have done heart transplants in Delhi.

In India, only 70 heart transplants have been done in17 years because very few families agree to donate organs. For every 10,000 people who need a heart transplant each year, only four are lucky enough to get a new heart that lets live. The heart if first retrieved from the donor which takes about 45 minutes.
